

# TEMPLE

Cut out pieces on the next page and fold on dotted lines. Write the definition of "temple" from Science and Health with Key to the Scriptures by Mary Baker Eddy (p. 595) on the bottom half of this page. Write the "chief corner stones" from p. 288 on the building pieces. Decorate and tape the pieces together. Assemble using the diagram and secure to the building footprint on the bottom of this page. You've made a model of what Solomon's Temple may have looked like! It housed the tablets with the 10 Commandments written on them.

TEMPLE:
