

Naaman was an important man but he was a leper. He had captured a little girl and she worked for Naaman's wife. The little girl told them that the prophet, Elisha could heal him of the leprosy.

Naaman went to see the prophet but Elisha did not even come out to see him! He sent a message that he should go and wash in the River Jordan 7 times. Naaman was really mad. He did not want to wash in that river. He wanted to be treated like he was really important. Finally his servants calmed him down. Elisha had not even asked him to do something hard. So he did what he had been told to do and was healed!

II Kings 5
